-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I (figures 1-4) in the reply filed on 09/26/05 is acknowledged. Claims 22-35 have been withdrawn since they are directed to a different embodiment.

An action on the merits now follows.

Drawings

The drawings were received on 11/25/05. These drawings are partially approved. Amendment to figure 7 was not received and thus not approved. Figure 4 included a proposed reference numeral 130 which was not in the figure 4 of the replacement sheet. Upon filing of the corrections, the drawings will be approved as a whole.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3763

Claims 11,16-17,19, 36 are rejected under 35 U.S.C. 102(e) as being anticipated by Zia et al. (US2002/0120224 A1) .

Zia et al. disclose a catheter hub having a lower and upper portion having a hinge 53 and a locking section for releasably securing the lower and upper portion. Zia et al. further disclose an interlocking engagement 60,61 between the lower and upper portion at the locking section. See figures 10-12.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Zia et al.

Zia et al. disclose the invention as substantially claimed. See above. However, Zia is silent to the material of the hub being polypropylene. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the material of the catheter hub with a less expensive , readily available and flexible material for easy handling, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended uses as a matter of obvious engineering choice lacking any criticality. In re Leshin , 125 USPQ 416.

Allowable Subject Matter

Claims 1-10 are allowable.

Claims 12-15, 18, 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
